RGT Gravity
AHDB Recommended List 2018

Variety Data: RGT GRAVITY

VARIETY OVERVIEW:

RGT Gravity is the highest yielding winter wheat in the UK. It gained automatic promotion to the latest 2018/19 AHDB Recommended List as a result, the first time a feed variety has achieved that for over a decade. This hard group 4 variety has proved very consistent, outperforming all other varieties in NL1 and NL2 and during its RL trial year. It goes onto the list with a clear advantage over any variety currently on the RL. Widespread uptake by seed producers this autumn will mean there will be enough seed to satisfy potentially very high demand next autumn.
