

Grow to expect the best

AT THE ROOT OF THE BEST JOB VACANCIES

PATHOLOGY SUPPORT

WE ARE LOOKING TO FILL A NEW VACANCY TO SUPPORT DISEASE AND ABIOTIC RESISTANCE BREEDING POLICY FOR OUR EUROPEAN OPERATIONS

Responsibilities: Testing of cereal breeding and research material, organisation of marker assisted selection. Collection, identification and characterisation of field pathogens. Day-to-day management of pre-breeding crossing, scoring of field trials and support other service function teams.

Post requires: Good organisational and communication skills, flexibility, attention to detail, ability to prioritise.

Position: Would suit an individual with Plant Science related degree or equivalent. Knowledge of laboratory techniques and field work required, with some experience of working with plants preferable. Full training will be provided.

The position at our Ickleton site is a permanent, full-time position working 37 hours per week plus additional hours at seasonal peaks of the year. Competitive salary & benefits.

Ready to make an exciting move and discover how you can grow to expect the best? Please send a CV to: Natasha Matthews Email: nmatthews@ragt.fr

Closing date: Friday 1st June 2018 Interviews on: Monday 11th & Tuesday 12th June
